I think I am ok with what you are saying. Of course I did not like this in the opening sentence "…. used for the fracturing of oil and gas wells" as this is not correct.

Also, see attached disposal summary.

Subject: CES Removal report format

Hey Gary,

I'm getting to the actual writing of the text for the report. In keeping with the format of the Assessment report, where we talk about the frac tanks, ASTs, vac boxes, etc., I would like you to look at the attached section on the Frac Tanks and see if this tells the story you want it to.

I didn't want to describe in the text the disposition of each and every tank, but I didn't want to over-generalize everything either. So, the compromise was to talk generally and then include a table showing tank, source, volume, waste profile, and disposal. ? I'd do the other sections in the same format.

Additionally, I'm going to include a master table (3-1) that shows all the information for each container, including analytical date and package, transportation date, manifest, etc., and refer to that "for more detailed information."

Does this work for you?

Thanks,

Daniel
